

Core Reality Science

Mr. Asim Debray

Tapoban City, Durgapur-713212, West Bengal, India.

Email: asim57debray@gmail.com

Present World is heading social, economic, moral and peace crisis. Obviously the gross want of the knowledge of naturally scientific brahma vidya (theology) in man often triggers illogicality in them and eventually causes crime and corruption to happen in this world. Core reality is a new branch of natural science the result of deep research for last 47 years that comes here as the remedy for all types of miscreation happening world over. This Science drills with brahma Vidya on the basis of Present i.e., physical Universe and the Past i.e., universal memory in pursuance of natural Laws that explains origination of willful universal Consciousness along with the creation of our Universe from absolute nothingness. The science which explains with natural proof the mutual transformations between the past Universe and the present Universe is core spirituality. Core Reality Science explains such, so this new science is a physical theology based on natural proof first time in the world which is a new dimension of physics and naturally scientific spirituality that unifies the natural science, philosophy and spirituality to reform the world to a heavenly goal. Hence the knowing of this Core Reality Science is human birthright which we do not know. This science needs to be more developed on its original basis after a thorough and intensive research, since it is the 1st step in its field.

Below are the placements of benefits to cosmopolitans the world over that comes of CoreReality Science the scientific brahma vidya which imparts brahma gyan (Theosophy) i.e. the knowledge which explains to the world the creation of

Universe along with the emergence of universal consciousness and organic consciousness (of living creatures) from absolute nothingness.

1. Core Reality Science makes mass people a freethinker, extremely wise and self-fulfilled.
2. Therefore, this makes all people intellectual.
3. As a result it turns common people scientifically and spiritually very wise, pure, honest and peace loving.
4. Therefore, this learning dissolves blind beliefs and superstitions.
5. As a result it takes away crimes and corruptions.
6. Therefore, it cures the religious malice arising from unscientific blind beliefs.
7. As a result it prevents riots.
8. Therefore, this science establishes fraternity world over.
9. As a result it brings unanimity and unity among different religions.
10. Therefore, it drives away the lack of elegance in performing works.
11. As a result it reduces the appetite for drug addictions .
12. Therefore, it develops mankind mentally and physically.
13. As a result this science gives clear idea of God.
14. Therefore, it brings scientific faith and belief in God.
15. As a result this science makes feel Oneness with God.
16. Therefore, it turns people scientifically spiritual.
17. As a result it reminds people about human birthright to be extremely wise (Brahmagyani) with a scientific mind.
18. Therefore, it raises slogan “Be a Brahma Gyani”.

So, this Core Reality Science will bring Golden Age on this planet with peace, prosperity and knowledge if properly focused the world over. Now please come with me and step into the depth of Core Reality Science for the better world than ever before. If there would be no Past, there would be no Present. Now we are in the Present therefore the Past becomes Present. The physical world of yesterday has gone Past, it has no physical existence in the Present now. It is only a memory in the mind like a picture and a description. Therefore Present comes from the Past which is a recorded description in the universal memory series (explanation follows).

If the world of yesterday would have been physically existing in the Present, there would be no change in the physical Present even after 24 hours and the time would be fixed as it is in a picture. Such does not happen in practice, moreover we find the partial

similarity by descriptions between Past and Present world and also find the full similarity between the present world and the next past world (memory). All these prove that, the Past comes into Present. Now let us know the Present.

What Is Present

Now, we are in this instant of the Universe which is a point of time. This point of time at this instant is called Present. We can only live in the Present not in the Past and Future. We can only see, touch and prove the physical existence of Present unlike Past and Future by many scientific experiments.

PRESENT THE UNIVERSE

It proves that multidimensional Universe only physically exists in the Present but Not in the Past and Future. Neither Past nor the Present come from Future or go into Future, it is an imaginary Present whom we call Future. So, the Present is a Being, Doing, Creation, Formation, “You (anything other than universal Me or memory)”, instant, Universe or One made up of space, energy and matter, because it is a Zero(0) or Nothingness before the initial Universe comes into being as a One (from Zero). One is the only number which comes from Zero that is Nothingness and also the One is not dependent on anything for its existence, there is no another One that comes from Zero i.e. Nothingness after the first One, so rest numbers from two(2) to unlimited we count are the fractions of that One which fractions appear in multiple numbers but none of them independently come from Zero(0) i.e. Nothingness, so the fractions are totally dependent upon the One for their existence.

So the One(1) is the first Present(entire creation) and a number that comes from Zero (0), i.e. initial Past i.e. Nothingness-memory at the beginning of memory Series.

Hence Nothingness-memory becomes a Present in multi physical dimensions. Only the Present is a multidimensional physical Creation unlike Past and Future.

Here the Creation is the total space containing luminous, non-luminous, gross, subtle, visible and invisible contents that originate from Zero(0) i.e. absolute nothingness and exists in a time cycle. We have come to know that, only the Present (Creation) is made up of space, energy and matters including dark energy, dark matters and antimatters etc.

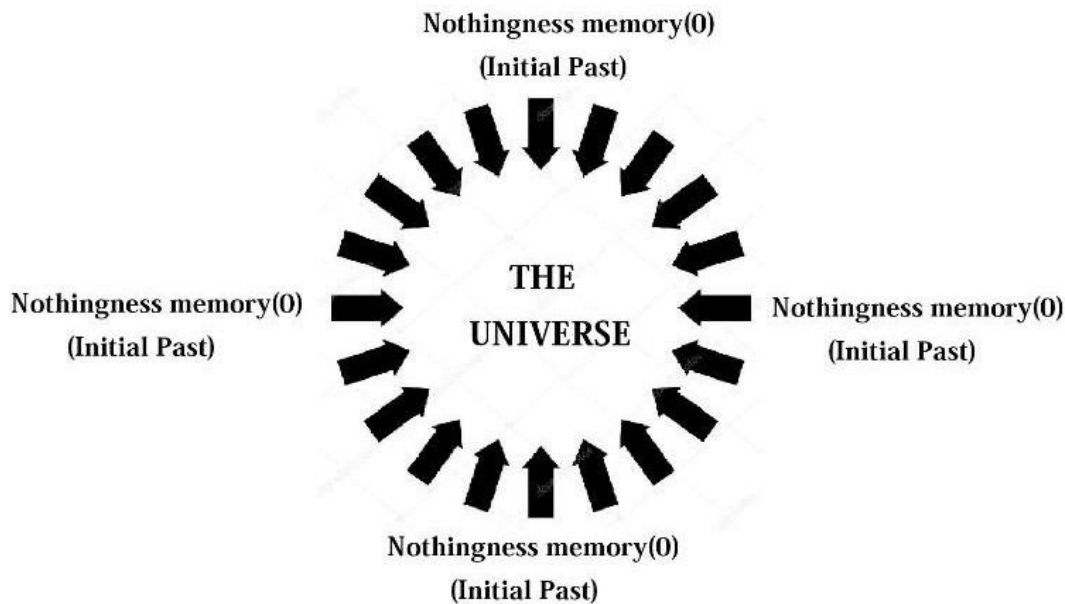

But not the Past and Future, only the Present has multidimensional physical existence. Since the Present i.e. the Creation has multiphysical dimensions, it has unlimited fractions of it which are not ones because they are not independent like One, they are dependent upon One (The Creation) for their existence, So they are two(2) to unlimited and the total is a One(1) i.e. One Creation i.e. Present because **when things number unlimited and also have multiphysical dimensions say, height, length, width etc. in the Present, they all exist in One(1) to from a One ie. Present(Creation) that comes from Nothingness-memory (initial Past) and which Creation has no multiple number coming in the second chance from the Nothingness-memory .** All fractions of the Creation exist side by side in the same One Present.

We have come to know here that, the Present is only a physically existent multidimensional Creation containing unlimited fractions of it and has no multiple number of it.

PRESENT→PAST→PRESENT TIME CYCLE

We experience in every moment that the existence of a particular thing is Zero (0) before it is created. A lot many incidents all over the Universe are happening chronologically down the Present →Past →Present →Past...time cycle and ultimately the Universe is passing through a change to maturity development.

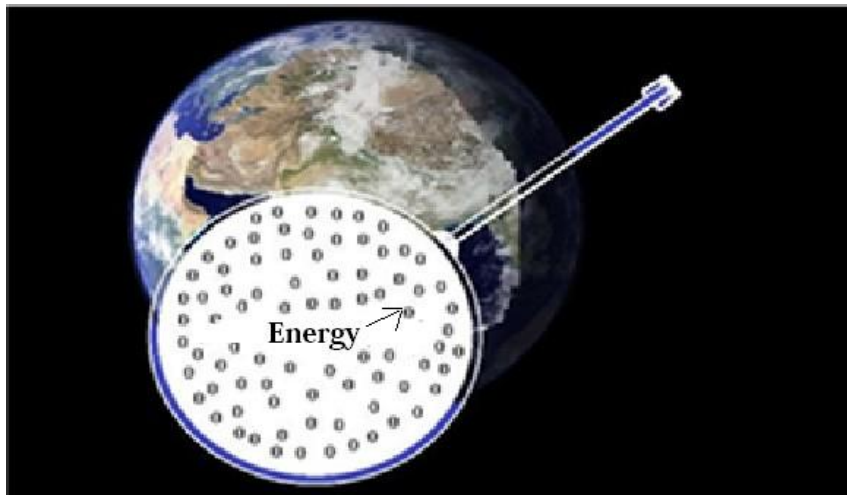

If we now consider the process of time cycle in reverse order up to the last point i.e. initial Past (beginner Past), i.e. $0 \leftarrow Pr(\text{one formed of Energy}) \leftarrow Pa \leftarrow Pr \leftarrow Pa \leftarrow \dots$, We find the Universe getting younger till it becomes Zero(0) i.e. Nothingness-memory or initial Past.

Always we cannot but start a work from the very beginning i.e. Zero (0). It is a Zero (0) before it appears as a One, So the initial One i.e. initial Universe comes from Nothingness which is a Nothingness-memory i.e. Zero (0).

All those prove that the Universe as an initial One(1) i.e. initial Present in the very beginning of creation comes first from Zero i.e. from Nothingness-memory as there is no another number before One(1) in the very beginning of creation. The Universe is a

Present, Present is only one in number in the Present, so we feel always to be in one or same Present. Therefore the Creation is only one in number that appears from the absolute Nothingness-memory.

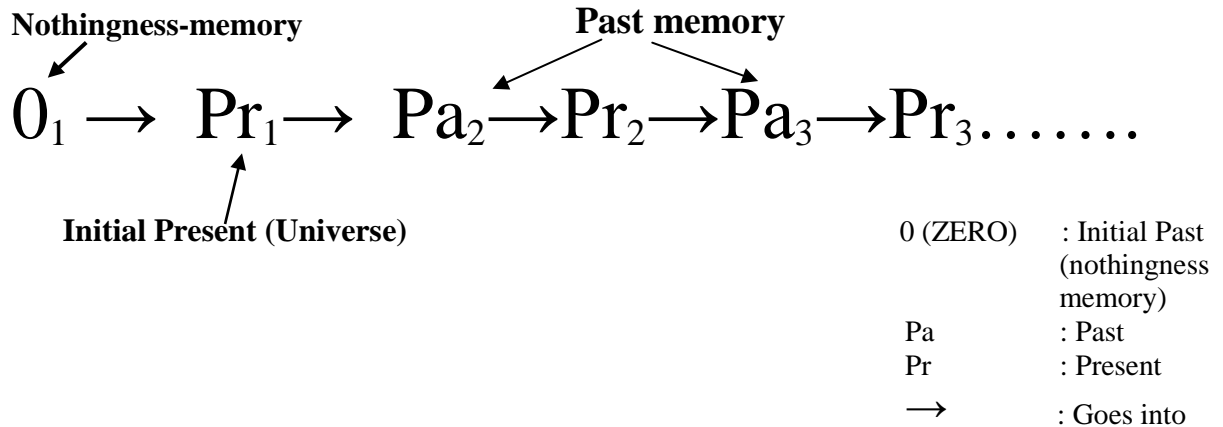

THE SMALLEST FRACTION OF THE UNIVERSE IS ENERGY

Therefore, there exists no multiple number of Creation or One i.e. Present that originated from Zero in the second chance for the Nothingness- memory gets transformed into the Creation. Many fractions of the Universe make One; many Ones do not make One. Fractions of One are not Ones that is why the One (1) is not divisible to an integer by any number greater than one (1).

So the One i.e. the Creation or the Present has no multiple number of it originated from Nothingness-memory and has unlimited fractions of it, fractions are not Ones, for smallest and finest fractions by all physical dimensions of One (1) are Energies in One.

Smallest fraction of space of the Universe at zero physical dimensions enables us to touch a thing at zero distance. When all physical dimensions of a fraction of Universe is finally reduced up to the last point, the Energy appears.

From these instances we can infer here that, the One (1) i.e. Present (Creation) is a converted or transformed form of Zero (0) i.e. Nothingness-memory which gets transformed into Energy (Present) and then memory of Energy (Past).

The time goes by, it proves that the Present becomes Past in the Present→Past→Present→Past...time cycle, otherwise there would be no Past, no time and no motion in the Universe. Motion is a Present → Past → Present time cycle.

MOTION THE RUNNING OF PRESENT-PAST-PRESENT TIME CYCLE

The Present would be stopped at a fixed time and the Universe would be like a still picture only but such does not happen in reality. We lose the specific Present (Universe) forever when it is Past. We cannot see, touch and prove the physical existence of previous Present (Past) in the later Present. In no way we can get back to the previous Present i.e. previous Universe.

Present becomes a memory of the Universe, i.e. Present becomes transformed into the Past. That is, it remains no longer space, energy and matter and ultimately the Present appears as universal memory (because the memory remains recorded in the Universal memory series as a fact).

After the Present gets transformed into the Past, a new Present i.e. changed physical existence of the Universe appears in practical reality. We notice

minutely that, this appearance of the new Present becomes partially similar to the memory i.e. Past of previous Present by descriptions, where from this new Present comes.

That is, the new appearance of the Present (Universe) becomes completely similar by descriptions to the changed or redesigned memory of the previous Present.

These observations lead us to conclude the following universal truths.

Proven Universal Truths

- ★ Only the Present is a Universe or entire creation but not the Past and Future.
- ★ The Universe has unlimited fractions of it.
- ★ The Creation i.e. Present has no multiple number of it.
- ★ The Present i.e. Universe is physically multidimensional
- ★ All the fractions or elements of the Creation lie side by side in One.
- ★ Things number unlimited and also have multiphysical dimensions exit in One.
- ★ The smallest fraction by all dimensions of Universe i.e. Present is Energy.
- ★ The Present, i.e. Universe becomes transformed into the Past, i.e. universal memory, i.e. Present becomes Past.
- ★ Present is the physically multidimensional perfectly similar transformed appearance of the redesigned memory of the previous Present (Past)

The present goes past and it becomes a memory. Now let us know the Past.

What Is Past

Present becomes Past in Zero(0) physical dimension. If the Universe of yesterday (which is Past) would have not been, we could have not seen the present Universe. At all there would be no physical existence of Present with motion but practically such does not happen with this Universe. We cannot see, touch and prove the physical existence of Past in the Present. In no way we can physically get back to the Past i.e. past Universe.

Past is a universal memory i.e. the description of the Present or Universe and this memory or the description becomes transformed into the Present as we experience in every moment otherwise there would be no physical Universe once the Universe goes past but such does not happen. It proves that the Past i.e. the memory of the Universe gets transformed into the Present in the Past → Present → Past → Present..... time cycle. Hence, Past (memory) becomes transformed into the Present (Universe). Descriptions (past-memories) become

Present (Universe), no Material is required to be brought from outside of the universe for the formation of Space & Luminaries, so the Space is endless, eternal and luminaries are infinite in number. If there is no memory (Past) of the Universe, there is no time, time without universal memory is not possible.

We cannot live in the Past and we cannot see and touch the physical existence of Past which is not a space, energy and matter or a mixture of those things in the Present.

Multidimensional physical existence of Past cannot be proven by any scientific experiment in the Present. Hence the Past has no physical existence because it is not the Present. Therefore, we can infer here that, the Past is a physically Zero dimensional memory in the Past → Present → Past → Present..... time cycle.

System Of Creation

It is a description of absolute nothingness only that appears as a memory of nothingness i.e., initial Past-memory at the beginning of universal time cycle before entire creation comes into being.

- ❖ Therefore, Nothingness-memory (0) itself becomes the cause of self existence as there is nothing before.
- ❖ Therefore, the first cause as a Nothingness-memory exists in Zero physical dimension for there is no physical existence before.
- ❖ Therefore, Nothingness-memory has no fraction of it because of zero physical dimension.
- ❖ Therefore, Nothingness-memory remains one and the same with unlimited numbers of it for no fraction of them in zero physical dimension.
- ❖ Therefore, Nothingness-memory exists in the Oneness with unlimited numbers of it for they are one and the same.
- ❖ Therefore, 1st Nothingness-memory goes into 2nd Nothingness-memory (self) because of the Oneness between them.
- ❖ Therefore, 2nd Nothingness-memory automatically comes (emerges) into the 1st Nothingness-memory since 1st Nothingness-memory goes into 2nd Nothingness-memory.
- ❖ Therefore, both the memories make a single Nothingness-memory in Oneness which is a smallest unit of time.
- ❖ Therefore, this single Nothingness-memory made of two Nothingness-memories in Oneness appears as remembering the 2nd memory by the 1st memory.
- ❖ Therefore, this remembering of Nothingness-memory appears as Doing by the 1st memory
- ❖ Therefore, this Doing appears as redesigned 1st Nothingness-memory as per the description of 2nd Nothingness-memory emerged

which there is no memory, no time cycle, only nothing, therefore Nothingness-memory becomes the only cause of self existence. The Nothingness-memory(0) goes in Oneness with self, since cause appears as Oneness everywhere in the Universe.

That means zeroness (properties of Nothingness) of Zero(0) goes (remembers) into Zero (self) i.e. first Zero(01) goes into second Zero(02) in Oneness as they are One and the same and as a result of this second Zero(02) comes (emerges in) into first Zero(01) and ultimately first Zero(01) gets redesigned as per the description of Nothingness, i.e. second Zero(02). In fact Single memory of the universal memory series comes into the latest memory “Me” of the series due to Oneness between them and as a result of this the description of the latest memory universal “Me” gets partially altered as per the description of preceding memory emerged in it. That partial alteration in the latest memory universal “Me” is called redesigning.

At the beginning of Creation redesigned first Zero(01) i.e. redesigned Nothingness-memory appears as One(1), i.e. initial Present(Pr1) or initial Universe from initial Past(01). All zeros are one and the same, they are the cause of self existence, so they exist in Oneness as the cause appears as Oneness, that is why, it results Zero(0) when the Zero(0) is divided or multiplied by any number.

At the creation of initial Universe i.e. Initial Present(Pr1) from the initial Past(01), the Nothingness-memory (0) appears as the smallest fractions by all dimensions of the initial Universe as Energy and this smallest fraction forms the initial Universe which is a redesigned nothingness memory in the beginning of creation.

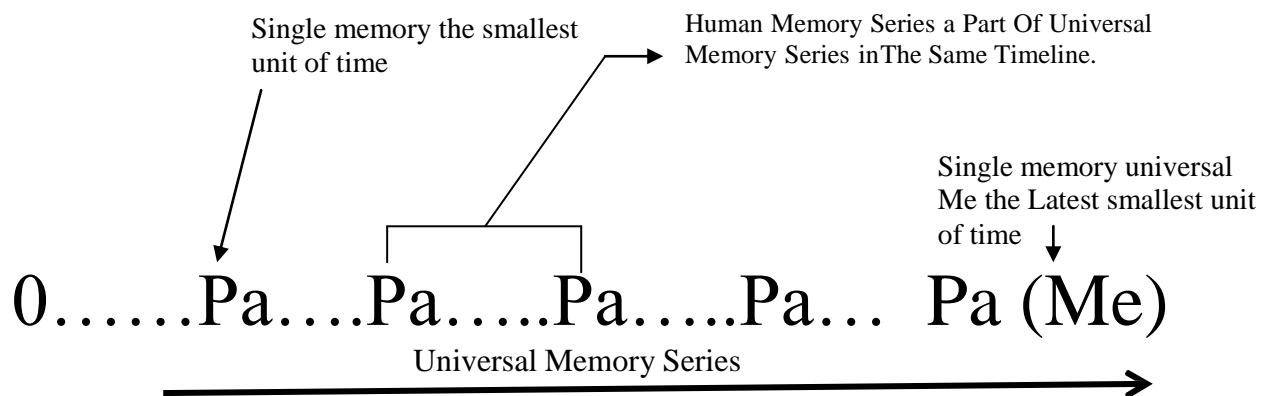

Initial Universe or the initial Present goes Past i.e. becomes a universal memory in the zero physical dimension and again the Universe comes back from the Past to Present in a new appearance and goes Past again in the Present → Past → Present → Past....time cycle.

Present becomes Past one after another and a series of Past, i.e. memory series is formed in a cyclic order down the time cycle. All the Pasts of these happenings chronologically one after another form a memory series of the Universe which is called a timeline. These chronological memories appear as the memory series of the Universe. Nothingness-memory gets redesigned into the various stages of developing Universe chronologically down the timeline after the creation of initial Present (Pr1) i.e. Universe. Memories of memory series in Oneness form the universal consciousness. So a single past or a memory cannot exist alone without a series, it is formed of unlimited numbers of same memory in Oneness with latest memory of the series of different memories. Past always exist as Consciousness. Oneness is the cause of all happenings in the Universe. Every cause behind every creation or happening throughout the Universe is Oneness which is a remembering. No money for work is in Oneness with no work without money, because no money for work is sensed as no work without money, therefore no money becomes the cause of no work. Strength of a bridge is in Oneness with longevity of the bridge because strength of bridge is sensed as longevity of bridge, therefore strength becomes the cause of longevity of the bridge. Calling (to come) a person is in Oneness with coming of the person, because calling(to come) is sensed as the cause of coming of the person, so calling is the cause of person's coming. If a boat pushes the shore, the shore also pushes the boat, both of the pushing are in oneness because pushing the shore is sensed as going away being pushed by the shore, so pushing the shore becomes the cause of being pushed by shore, Oneness is the main cause here. That means entire Universe is being created by means

of remembering (to make oneness with) being done by latest memory or Past, i.e. conscious mind of supreme Consciousness in every smallest unit of time in the time cycle, say, $Pr \rightarrow Pa \rightarrow Pr \rightarrow Pa \rightarrow Pr \dots$ which appears as causal connection.

A single memory or Past (Pa) in the memory series is a smallest unit of time, so the timeline $0 \rightarrow Past \rightarrow Past \rightarrow Past \dots$ starting from nothingness is a universal memory series. Latest memory “Me” of human memory series exists in the latest memory “Me” of universal memory series i.e. in the same universal timeline. Single latest human memory “Me” exists in the single latest universal memory “Me” in the same memory series, so both human “Me” and universal “Me” are same but memory series are different because of difference in bodies like human body and third dimensional space-body of the universe containing luminaries. Now if we set human Me in the space-body and deeply feel third dimensional space as our body and luminaries are our internal organs of the body and the space moves when we move, our human consciousness turns into the universal consciousness but the practice should be continued.

Whereas this memory series is a universal timeline and humans exist lifelong in the same timeline.

Complete human memory series gets included in the universal memory series as a part of it. Whereas human memory series becomes a part of universal memory series and it appears as human Consciousness and universal memory series appears as universal Consciousness, human Consciousness becomes a part of universal Consciousness and human “Me” exists in universal “Me” (Supreme Consciousness) at the latest memory of universal memory series i.e. universal timeline, therefore human memory series (so called human soul) i.e. human consciousness exists in the universal memory series (so called supreme consciousness) i.e. universal consciousness all the time and even after the death of human body.

Smallest unit of time is a single memory of the Universe in the

$0 \rightarrow Pr \text{ (Present)} \rightarrow Pa \text{ (Past)} \rightarrow Pr \text{ (Present)} \rightarrow Pa \text{ (Past)} \dots$ time cycle.

Therefore time is a universal memory and the total timeline is a memory series of the Universe. If we go down the memory series in reverse order, we find the numbers of memories reducing and finally we reach to the simplest universal memory which is an initial past-memory or primitive universal consciousness i.e. initial or simplest Past as an absolute Nothingness-memory which is the first cause and where there is no time, no primitive form of the universe only nothing i.e. Zero (0) a Nothingness memory in the beginning of universal

time cycle which begins the creation of Universe. When there exists no Creation, there exists nothing, i.e. Nothingness- memory which is a description of no Creation.

So, the Past is a Zero(0), Memory, Nothingness-memory, Time, Timeline, Memory series, Consciousness, universal Me(i.e. "I"). When we are busy working, we can not feel time because the latest time is human as well as universal "Me" and we go in Oneness with universal Me by doing works but when we are free and the frequency of doing is less and we have to wait long, we cannot go in Oneness with universal Me for tensions. So it becomes boring though the time is universal consciousness. To work for an hour means to work till it becomes a memory series of an hour. **Different unlimited Memories of the memory series exist in the latest single memory universal Me of the series in Oneness hence from a single memory of the universe and it becomes unlimited fractions of the Universe in One to form the Universe and in oneness it forms universal Consciousness.** Memories of the series are smallest units of time.

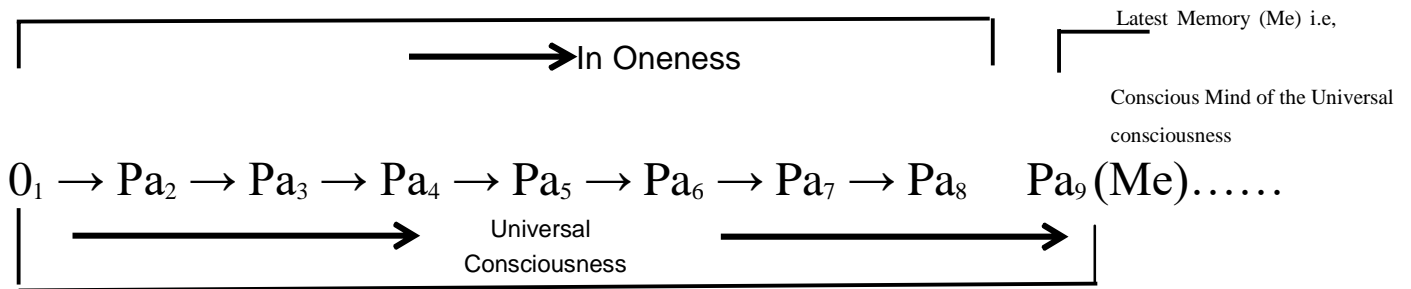

Since our memory series is a part of universal memory series and we can not feel "Me" going back a moment, rather we feel "Me" at the latest single memory of our memory series, It proves that the latest single memory of the universal memory series appears as universal Me i.e. universal conscious mind and it is also a smallest unit of time.

Universal memories of the universal memory series exist in Oneness with the latest single memory of the series to form the Universe. Memories of the series are smallest units of time and latest single memory of the series is also a smallest unit of time, since memories of the series exist in Oneness with latest single memory to form the universe, seconds per second or years per year time rate is not equal everywhere in the Universe. All single memories of the universal memory series exist in Oneness with unlimited numbers of it.

Memories of the memory series are always universal. Whatever happens or comes into being chronologically down the time cycle of the Universe becomes Past. Past always gets recorded in the universal timeline only then it becomes a fact or truth and a memory of the Universe, since it comes from a happening or being. In other words a fact or truth that happened becomes a universal memory. Whatever happens in front of us becomes Past and the Past comes as our as well as universal memory as a fact or truth, but the thing that happens in our absence becomes Past and the Past comes as universal memory only because the thing is a fact or truth. So it takes place in the universal memory series as a memory. Only a fact or truth can become a memory of the Universe. So, it is proven that whatever goes Past becomes universal memory.

Since happenings or beings can only go Past and consequently they can become a (Past) memory or a memory series in the long run, Past is always a truth and form a universal memory series.

Subconscious Mind of the Universe

Timeline (Memory Series)

Series of Pasts (memories) form a memory series. All the memories of the series exist in Oneness i.e. memories of the universal memory series go in Oneness with the latest single memory “Me” of the series in zero physical dimension to form a single memory of the universe i.e. a smallest unit of time and it forms the universal consciousness of conscious and subconscious mind in Oneness in the single latest memory “Me”, i.e. universal subconscious mind exists in the universal conscious mind. One memory in Oneness with another memory makes a single latest memory i.e., one smallest unit of time but that latest memory cannot go in Oneness with all the memories of the series in one smallest unit of time and hence it develops a choosing power or self-motivating will to go in Oneness with the memories of the series by turns. Initial Nothingness-memory(01) is the initial or simplest Past at the very beginning of the creation of Universe. All the memories of the memory series emerge here in this example in the latest single memory (Pa9) of the series due to Oneness among memories but not in the initial Nothingness-memory(01) for the memory series starts from the Nothingness-memory(01). Latest single memory (Pa9) of the memory series appears as universal Me and this “Me” appears as the conscious mind of universal consciousness. Memories starting from Nothingness-memory emerged in the latest memory universal “Me” appears as subconscious mind of universal Consciousness. Memory series of the Universe appears as universal timeline. Universal timeline appears as universal Consciousness, i.e. Supreme Consciousness. Memories of the series in Oneness form universal Consciousness. Memories of the series in One form various fractions of the Universe to form complete Universe. All the memories of the series exist in zero physical dimension, i.e. in a point which causes Oneness among them.

The latest memory of the universal memory series appears as universal Me, i.e. ego or conscious mind which always appears as a Present (universe) in a remembering process by Oneness and rest part of the memory series appears as subconscious mind of the universal Consciousness which always appears as fractions of the universe.

Memories in Oneness Appear As Universal i.e., Supreme Consciousness

So the universal memory series of conscious and subconscious mind appears as universal Consciousness in oneness whom we call almighty supreme consciousness.

As regards the proof when we look into the human Consciousness, as it is a part of universal Consciousness. We feel “Me” (ego, conscious mind) on the latest memory of human memory series on the timeline and the rest human memories of the memory series left behind appear as our subconscious mind. We can know the universal Consciousness in comparison with human Consciousness because all the memories of human Consciousness are also the memory of universal Consciousness but all the memories of universal Consciousness are not the memory of human Consciousness because a countless unknown and unseen happenings are occurring through out the Universe which come as universal timeline or memories in the universal memory series but do not appear as human memories since these are not seen or experienced by human but all human experienced memories are the memory of universal Consciousness because these exist in the universal timeline.

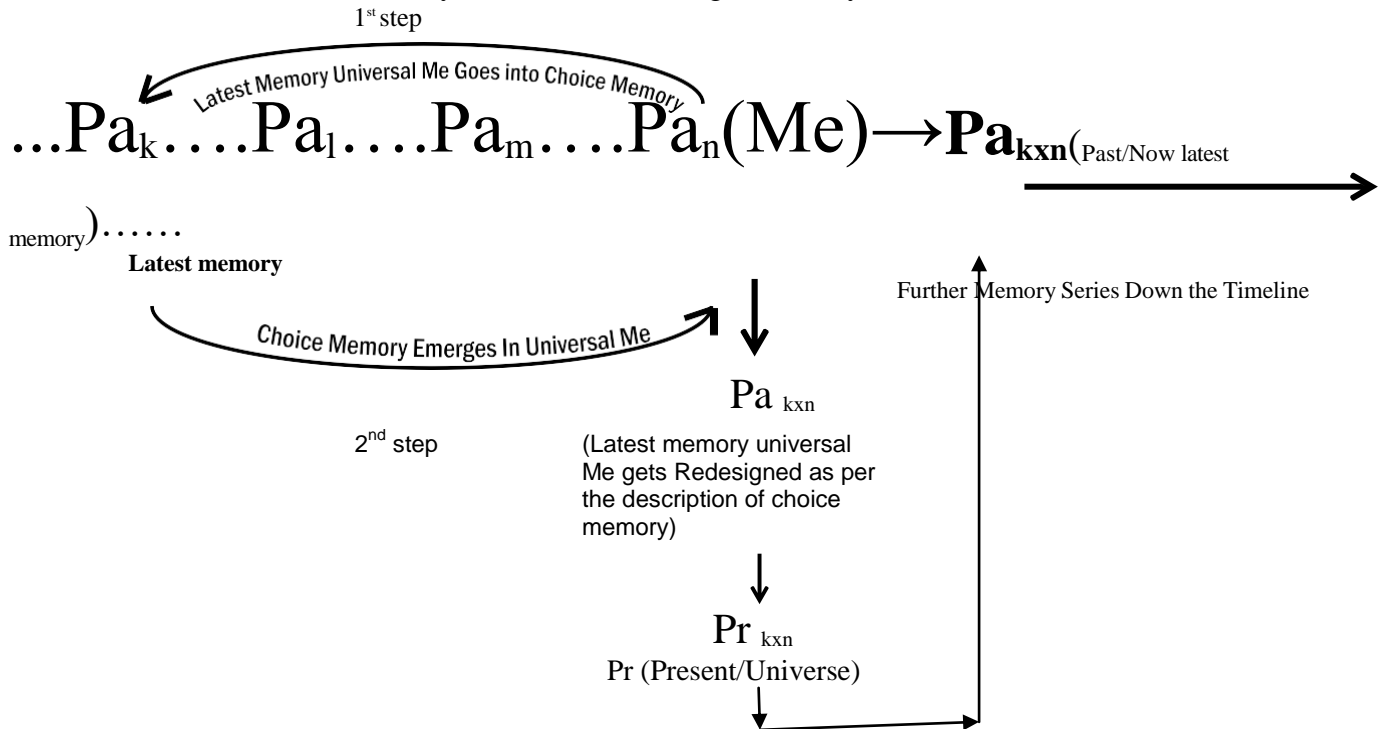

Memory i.e. Past becomes Present (Universe), there are examples with proofs in support of that universal truth, say, when I do a thing that Doing is nothing but a remembering resulting in redesigned latest memory or latest Past appearing as conscious mind “Me(I)” of my memory series and it appears as “You” i.e. Present i.e. the thing done (creation other than memory or Consciousness). Now, I do and it is done, so it proves that the Doing i.e. conscious power directly becomes Present. Past does not directly become Present, it becomes Present through Doing (remembering) i.e. redesigning on the latest universal memory “Me”.
Redesigned latest Past-memory directly appears as physically multidimensional Creation.

The universal Me i.e. universal Consciousness becomes Universe i.e. “You” (other than universal Me).

We never find anything in our memory series which is not in the universal memory series because our (human) memory series is a part of universal memory series.

The latest memory(P_{a_n}) of the universal memory series i.e. Universal consciousness gets redesigned ($P_{a_{kxn}}$) as a result of Oneness (which causes remembering) with the memory(P_{a_k}) of His choice as in this example. This Oneness($P_{a_{kxn}}$) between memories appears as Doing, i.e. redesigning on the latest memory universal Me. One memory goes in Oneness with another memory and thus form a single memory made of them.

i.e. latest memory(P_{a_n}) of the series goes (remembers which is a Doing) into another memory (P_{a_k}) of His choice in order to create His own conscious organic replica in the universe i.e. latest memory(P_{a_n}) meditates on the choice memory(P_{a_k}) i.e. remembers

$[P_{a_n} \rightarrow P_{a_k}]$ it and in turn simultaneously the choice memory(P_{a_k}) comes in the latest memory(P_{a_n}) i.e., ($P_{a_k} \rightarrow P_{a_n}$) with analogous memory if any and as a result the latest memory(P_{a_n}) gets redesigned i.e., $P_{a_{kxn}}$ (as the appearance of sand the base material gets redesigned as per the design of hand pressed on it and sand turns into a hand print) as per the description of choice memory (P_{a_k}) and it appears as redesigned universal Me ($P_{a_{kxn}}$), this redesigned universal Me can not take place as a latest memory (Past) in the universal memory series, since it has not directly come from Present.

Since this redesigned latest memory (Pa_{kxn}) or past cannot take place in the universal memory series for it has not come from Present, soon directly the redesigned latest memory (Pa_{kxn}) i.e. “Me” which is a universal consciousness as universal Doing appears as Energy (Pr_{kxn}) as a Present or creation in the beginning of universe. Now the Past form of this Present i.e. Energy takes place as a latest memory “Me” i.e., Pa_{kxn} in the universal memory series. This latest memory (Pa_{kxn}) of the memory series perfectly resembles the redesigned memory (Pa_{kxn}) just before the preceding Present (Pr_{kxn}) which redesigned memory can not take place in the Universal memory series.

Memories are of two types, existence of the Universe is a Nothingness-memory(0) before the Universe is created and it is a Past memory(0) or simply a memory if the Universe goes Past during the creation and after the creation of it down the time cycle. The Present is called creation in the $Pr \rightarrow Pa \rightarrow Pr$ universal time cycle chronologically starting from the Energy down to the Matters via Space, Radiations and Plasmata. Again the Present is called formation down the Galaxies, Stars, Planets and Lives after the creation of basic Universe. Formation process down the time cycle is still going on. Past becomes Present, Past is a memory so all two types of memories [Nothingness-memory(0) & Past memory(0)] become Present i.e. a being. All types of memories are denoted by Zero (0) here.

Latest memory “Me” gets redesigned as per the description of choice memory, That is why we see the partial similarity but not the perfect similarity between the Universe of this instant and the Universe of a second ago. **Doing directly appears as a creation which is called a being during the creation of basic Universe up to the level of Matter.**

(a) When the Doing comes with no Past memory, then no memory i.e. Nothingness-memory goes into Nothingness-memory (self) because of Oneness between them and that Oneness in the form of Doing i.e. redesigned nothingness memory or conscious power directly appears as a creation of Energy i.e. One (1) or Singularity from Nothingness-memory (0) as a Present.

(b) When the Doing comes with the memories of Energy (E) and Nothingness memory (0), the memory of energy goes into Nothingness-memory (0) and that Doing i.e. Conscious Power the latest memory (of energy) universal Me gets redesigned and directly appears as a creation of Space which is a redesigned memory of energy as per the description of Nothingness. The Universe begins with creation only not with the formation since there is Nothingness-memory (0) at the beginning of Universe creation. Later the Universe follows formation not the creation because of existing memories of forming elements (say memories of Energy, Space, Radiation, Plasma, Matter and any earthly material) are there in the memory series. Creations occur very

fast unlike formation in the beginning of Universe, but some formations take billions of years of time.

On the other hand Doing indirectly appears as a formation which is called a happening after the creation of basic Universe up to the level of Matter.

e.g.(a) When the Doing comes with memories of third dimensional space, Matter and Radiation of energy etc. in the direction of forming objects like galaxies, galaxies as a Present get formed of 3D space, Matter and Radiation through a countless number of formations over billions of years.

(b) When the Doing comes with the memories of Stars, space, energy, and matter in the direction of forming desired objects, like planets, the Doing goes step by step by twos using the memories in the same process through a countless number of formations over billions of years, planets as a Present get formed of Space, Energy and Matter.

(c) When the Doing comes with the memories of pot, milk, tea leaf and sugar etc. in the memory series, step by step by twos using these in the same process a desired cup of tea as a Present gets formed of milk and tea liquor etc. over ten minutes. Formations take time ranging from a second to billions of years, because some formations come after a countless number of formations down the time cycle.

We cannot recall to the memory which is not in the Universe, i.e. not in the universal memory series, imaginations are also made of memories, if we imagine a living gold bird which is not available in the Universe, gold and birds are already there in the world and the world is a part of the Universe.

We have the memory of gold and living bird that is why we can imagine a living gold bird. It proves that we can only recall to the memory which is already there in the Universe, we can only do a thing which is in our memory. Because our memory series is a part of universal memory series in the same timeline, if the thing is not there in the mind as a memory, in no way we can do that thing. If memories are already there in the mind then alone we can do that thing accordingly. It proves that memories become creations as well as formations.

Here memories come in Oneness and that Oneness appears as Doing and that Doing appears as conscious Power i.e. redesigned memory and then that redesigned memory appears as energy, say light energy, heat energy, electric energy, magnetic energy etc. which leads to creations made of space, energy and matter according to the redesigned memory i.e. Past.

Past i.e. the universal memory becomes transformed into the Present (i.e. Universe) through a process but this latest Universe does not perfectly resemble the preceding universal memory by descriptions.

There is a difference in description between the preceding universal memory i.e. Past and the latest Universe (transformed memory), i.e. Present. If we make a change in the multidimensional Present (a thing or Universe) there comes a corresponding change in the next memory (Past) of it (a thing or Universe) which ultimately appears in the $Pr \rightarrow Pa \rightarrow Pr \rightarrow Pa \dots$ time cycle. Therefore, if there is a change (redesigning) in the Past (memory), due to Oneness between them there is also a change in the Present that comes after Past. So the redesigned memory i.e. altered memory of the preceding Universe appears as Present i.e. Universe. So the latest memory of the Universe does not directly come as new Universe. Only the redesigned memory directly appears as the altered new Universe in every smallest unit of time because smallest unit of time is a single memory.

This proves that the latest universal memory (universal me) i.e. Past gets redesigned and that redesigned memory directly becomes transformed into the latest Present i.e. Universe. So the latest Universe perfectly resembles the redesigned memory that directly comes into the Present (Universe). This redesigning of the memory happens due to the Oneness between memories in the memory series.

Latest memory is the highest developed memory on the memory series, because a memory becomes highest developed at its latest stage through gradual developments in every time cycle $Pa \rightarrow Pr \rightarrow Pa \dots$

$$O_1 \rightarrow Pa_2 \rightarrow Pa_3 \rightarrow Pa_4 \rightarrow Pa_5 \rightarrow Pa_6 \rightarrow Pa_7 (Me) \dots$$

Memories in the Series Form Universal Consciousness in Oneness

Since creation of Universe till today, every unlimited number of smallest unit of time as a single Memory (Past) becomes Present, i.e. developing Universe and thus each single memory becomes a fraction of the Universe. Every physical thing having a description in this universe is a fraction of the Universe. Energy, space, radiation, matter etc. are also the fractions of the universe for having a description.

$$Pr_1 + Pr_2 + Pr_3 + Pr_4 + Pr_5 + Pr_6 + Pr_7 \dots$$

THE UNIVERSE MADE OF FRACTIONS

Memories in the series form fractions of Universe, i.e. Present in One not in oneness

So, all the memories of the series $0 \rightarrow Pa \rightarrow Pa \rightarrow Pa \rightarrow Pa (Me) \dots$ come in Oneness with the latest memory i.e. universal Me and the total memory series (including “Me” the latest memory) becomes transformed into the Present i.e. Universe.

Therefore all universal memories of the memory series independently come in Oneness with the latest Past i.e. latest memory “Me” in the latest smallest unit of time. Automatically in reverse order the latest memory universal Me also tends to go in Oneness with all the single memories of the series in the latest smallest unit of time (in a single memory) but since smallest unit of time is a single memory, the universal Me i.e. the latest Past-memory cannot go in Oneness separately with all the single memories of the series in the latest smallest unit of time. i.e. at the same one single latest memory because of all memories are not same, they are different, so it requires long time (many independent smallest units of time) for making Oneness with many different memories. So a choosing power in universal Me (i.e. Consciousness) automatically develops at this stage to balance both side of Oneness ($Pa \rightleftharpoons Pa$) for making Oneness with a certain memory from His memory series as per His choice.

This very choosing power appears as a self motivating will or willfulness in the latest memory universal “Me” and rest memories of the series appear as subconscious mind of universal Me and universal “Me” i.e. the latest memory appears as the conscious mind of the universal Consciousness i.e. so called Supreme Consciousness.

All above takes us to the universal truths as it follows:

Proven Universal Truths

- ★ Nothingness is a memory before the creation of universe.
- ★ Memories in oneness form universal or supreme consciousness.
- ★ Memories in One form Universe.
- ★ One Nothingness-memory(0) appears as more than one Nothingness-memories in Oneness.
- ★ Nothingness-memory is a primitive universal conscious power.
- ★ The initial or beginner Past at the beginning of Universe is a memory of Nothingness i.e. Zero(0).
- ★ The Nothingness-memory i.e. Zero has no physical dimension.
- ★ The Zero (0) has no fraction of it.
- ★ The Zero(0) has unlimited numbers of it in Oneness.
- ★ Memories number unlimited and also have no fraction of them causing a zero physical dimension exist in Oneness resulting emergence of one into another.
- ★ All the Zeros i.e. Nothingness memories exist in Oneness, i.e. appear as same one Zero (0) because of Oneness among them.
- ★ The Past becomes transformed into the Present, i.e. Universe.
- ★ Past is a memory of Universe.

- ★ Past is time.
- ★ A single memory is a smallest unit of time.
- ★ A single memory lies in Oneness with unlimited numbers of it in zero physical dimension.
- ★ Memories in serial order form a universal memory series.
- ★ Universal memory series is a timeline.
- ★ Timeline is universal Consciousness.
- ★ The latest memory of memory series down the timeline is universal Me, i.e. conscious universal mind or universal ego i.e. Universal Consciousness.
- ★ Rest part of the universal memory series comes as subconscious mind of universal Consciousness.
- ★ Universal Consciousness appears as Supreme Consciousness.
- ★ Present becomes Past and the series of Past appears as universal Consciousness.
- ★ Universal memory series is a universal Consciousness.
- ★ Universal memory series in One appears as Universe and in Oneness appears as universal consciousness.
- ★ Timeline in One becomes Present and appears as Universe.
- ★ Nothingness memory, i.e. Zero (0) shapes as various memories i.e. Past in course of timeline through many time cycles.
- ★ Doing is a redesigned memory.
- ★ Memories in the Present exist as fractions of One(universe or creation).
- ★ Memories in the Past exist in Oneness to form willful Consciousness.
- ★ Universal conscious mind “Me” becomes multidimensional Universe.
- ★ Doing appears as Being.
- ★ **Oneness among nothingness memories(0) create parallel universes .**
- ★ Oneness between nothingness memories(0) appears as Doing (initial consciousness at the beginning of Universe) i.e. a change in Nothingness- memory.The
- ★ Past i.e. universal memory or time becomes transformed into the multidimensional physical present Universe after a change in it.
- ★ Human memory series is a part of universal memory series.
- ★ Latest memory “Me” of human memory series and the latest memory “Me” of universal memory series are same for human latest memory “Me” exists in the universal latest memory “Me” a single memory and a smallest unit of time but memory series are different.
- ★ Universal Me goes into the memory of His choice in the memory series being driven by Oneness among them.
- ★ The choice memory simultaneously (i.e. in the same single memory universal Me) comes into universal Me due to Oneness between them.
- ★ The Oneness between memories appears as Doing i.e. Creation.
- ★ The Doing does the redesigning on universal “Me” i.e. redesigns universal “Me” as per the description of choice memory.

- ★ The redesigned(altered) memory or Past can not exist in the memory series for it has not come from Present.
- ★ The Doing, directly becomes energy (Present), say-light energy, heat energy, mechanical energy, kinetic energy, electric energy, magnetic energy, gravitational energy, chemical energy, charge etc. and these energies shape into creation, i.e. the thing done or entire Universe.
- ★ Redesigned nothingness memory as well as redesigned memory appears as Present (creation).

How The Past Becomes Present

A single memory in zero physical dimension numbers more than one in Oneness and it goes into self because of Oneness between and finally appears as a Present, i.e. creation. Universal Consciousness the latest memory of the universal memory series, i.e. universal Me remembers or meditates on a memory of His choice from His subconscious mind, i.e. from His memory series by His will and goes in Oneness with the memory of His choice and as a result the choice memory emerges in universal Me due to Oneness between them and consequently the universal Me gets redesigned as per the description of choice memory. Now this redesigned universal Me directly appears as Present, i.e. Universe from Past in a smallest unit of Time, because the redesigned universal Me the latest memory can not exist at this stage in the memory series for it has not come from Present, so it becomes Present, i.e. Universe. Redesigned memory is a description only, so descriptions only become multidimensional Universe i.e. Past becomes Present.

After the latest memory universal Me gets redesigned and directly appears as Present, the original design of latest memory takes place in the universal memory series as an unchanged memory. Thus in the same repeated process down the timeline universal memory series becomes longer despite of the transformations of universal memories into Present for they are unlimited in numbers in Oneness . Universal consciousness and the Universe become as much matured as the universal memory series goes longer. Such happens because a memory has no fraction of it in zero physical dimensions and a memory has multiple number of it in Oneness. The Past becomes Present down the time cycle Pa→Pr→Pa and simultaneously both the Universe as well as the universal Consciousness goes gradually matured in every time cycle. This is how the Past becomes Present.

How The Present Becomes Past

Present (Universe) Becomes Past (Time) the Universal Consciousness

The choice memory redesigns the latest universal memory “Me” in the memory series due to Oneness between them. Once the latest memory “Me” gets redesigned, it goes Present, a Present can not exist in the memory series because it is not a memory and since the Present is a redesigned memory (other form of Past), the Present becomes Past and this Past occupies a place left by redesigned memory of same description in the memory series to keep up the ongoing time cycle aiming the maturity development of universal consciousness and the Universe. This is how the Present becomes Past and the time cycle $Pr \rightarrow Pa \rightarrow Pr \rightarrow Pa \dots$ goes on.

How The Creation Of Multiverse Occurs

Parallel Universes (Multiverse)

It is a Nothingness-memory(0) before the entire creation. The Nothingness-memory, i.e. the Zero(0) has no fraction of it, so the Zero(0) i.e. Nothingness-memory exists in no physical dimension. Since the Zero(0) exists in no physical dimension, the Zero(0) numbers unlimited. Since the Zero(0) numbers unlimited in no physical dimension, they all exist in Oneness. Oneness is the cause of all happenings and the creation of Universe.

One Zero(0) goes (remembers) into another Zero(0) being driven by Oneness between them and simultaneously that another Zero(0) comes (emerges) into the first Zero(0) as a result of remembering it and this Doing(remembering) appears as the Being, i.e. initialUniverse as a Present from Past.

Since the Zero(0) exists in Oneness with unlimited numbers of Zeros, unlimited numbers of parallel initial universes simultaneously come (from unlimited individual Nothingness-memories) into beings as a Multiverse with the first Universe as a Present. Whereas unlimited memories of unlimited Universes appear as Present in the One, they appear as One, i.e. one Multiverse in the Present. There is nothingness in between parallel universes, nothingness indicates a touch at Zero distance, so the parallel universes are touching together in the Multiverse

Since all the universes are in One, i.e. in a Multiverse, travelling of an object is possible from one universe to another Universe as per the negotiation made between two individual willful universal consciousness's.

Smallest unit of time is a single memory, many single memories can exist in a single memory because of Oneness among them, so many smallest units of time can exist in a single smallest unit of time, and therefore seconds per second rate of time is not equal in every parallel universe and everywhere in our universe.

How The Creation Of Our Universe Occurs

$$0_1 \rightarrow [0_1 \rightarrow 0_2] \rightarrow [0_2 \rightarrow 0_1] \rightarrow 0_{2x1} \rightarrow Pr_E \rightarrow Pa_E$$

0 : Zero
 → :Goes into/
 Comes into
 Pr: Present
 Pa: Past
 E : Energy

Our Universe

I being a human or any organic Me can not exist without Doing a thing, So the thing done by me shapes as per Me, likewise the thing done by universal Me shapes as per Him, therefore all the Doings done by universal Me go in the direction to the creation or formation of Present i.e. Universe as per the description of the redesigned latest memory universal Me. Therefore it proves that Universal Me always makes multi dimensional physical figure of Self as a Present by Doing. So “I” as a universal consciousness do, i.e. I appear as doing, the doing appears as being, therefore “I” the universal consciousness (Past) finally appear as Being (Present). It proves that the universal consciousness becomes transformed into the Universe.

Whatever I do as a universal consciousness (Past) becomes done (Present), therefore I (Past) become a formation or creation i.e. Present in the design of redesigned Me. I am a consciousness, therefore I always do i.e. choose a memory from my memory series to go in Oneness with (called remembering) in the direction of creating the description of my own design of consciousness on the Present(body) and it appears as organic consciousness (living creatures) in the Universe.

At the very beginning of creation of universe, there exists absolute Nothingness only. That absolute Nothingness is a memory i.e. initial or simplest Past for it exists before the creation of Present, i.e. Universe. This initial Past is a Zero(0), i.e. absolute nothingness memory. Before the Nothingness- memory(0) i.e., initial or simplest Past-memory of the Universe, there exists no memory ,no time cycle, only nothing, therefore Nothingness-memory becomes the only cause of self-existence , since a cause appears as Oneness ,The Nothingness-memory (0_1) goes into (remembers ie, meditates on) Oneness with Self (0_2), i.e. [$0_1 \rightarrow 0_2$] which is a Doing because of oneness (for they are one and the same) between them and as a result of this Doing(remembering), the nothingness memory 0_2 comes into(emerges) the nothingness memory 0_1 , i.e. [$0_2 \rightarrow 0_1$] due to oneness between them.

Next as a result Nothingness-memory (0_1) gets redesigned(0_{2x1}) as per the description of Nothingness memory (0_2) emerged in it due to oneness between them. Since both are one and the same Nothingness memory in zero physical dimension, Nothingness memory (0_1) gets redesigned in the form of redesigned memory (0_{2x1}) which has not come from Present. So this redesigned memory (0_{2x1}) can not take place in the universal memory series, therefore this Doing (redesigned memory) appears as a Present i.e. One (1) from Zero(0_1) in the appearance of Energy (Pr_E) as a creation of a singularity Universe. Since redesigned Nothingness memory (0_{2x1}) can not exist in the universal memory series, the present (Pr_E) i.e., Energy become Past (Pa_E)

Next this Past (Pa_E), i.e. memory of energy takes place in the universal memory series and universal memory series appears as $0 \rightarrow Pa_E$ the primitive universal consciousness upto this stage of universal development and maturity. Redesigned memory of Nothingness (0_{2x1}) and the memory of Energy (Pa_E) are one and the same memory by description, yet the redesigned memory of Nothingness can not exist in the universal memory series before coming into the Present in order to complete the time cycle. Here Pa_E is the latest memory “Me” of the initial memory series

i.e., timeline $0 \rightarrow Pa_E$.

Next, $[Pa_E \rightarrow 0] \rightarrow [0 \rightarrow Pa_E] \rightarrow Pa_{(0xE)} \rightarrow Pr_S \rightarrow Pa_S$ [S : Space]

Time cycle goes on, latest memory “Me” the memory of Energy (Pa_E) goes into the Nothingness-memory (0), i.e. $[Pa_E \rightarrow 0]$ because of Oneness between them and as a result of this the Nothingness memory(0) emerges in the memory of Energy (Pa_E), i.e. $[0 \rightarrow Pa_E]$ due to Oneness between them. As a result, the energy memory (Pa_E) gets

redesigned as $Pa_{(0xE)}$ as per the description of Nothingness-memory(0) emerged in it due to oneness between them.

Redesigned energy memory $[Pa_{(0xE)}]$ has not come from Present. So this redesigned energy-memory (another form of Present) cannot take place in the universal memory series. Therefore, this redesigned memory of Energy appears as a Present in the appearance of 3D Space (Pr_S) as a creation because, when Nothingness-memory comes into the memory of Energy, the energy memory gets redesigned in the form of Nothingness and it appears as Space, so the Space seems to be a vacuum or nothingness compared to Energy and Matter, here Energy is redesigned in the appearance of Space.

Redesigned energy memory $[Pa_{(0xE)}]$ cannot exist in the universal memory series, So the Present (Pr_S) other from of redesigned energy-memory becomes Past (Pa_S) and it takes place as a memory in the universal memory series and universal memory series appears as $0 \rightarrow Pa_E \rightarrow Pa_S$ up to this stage of universal development & maturity. Redesigned memory of Energy $[Pa_{(0xE)}]$ and the memory of Space (Pa_S) are same by descriptions but redesigned memory of Energy $[Pa_{(0xE)}]$ can only exist in the universal memory series after going into Present (Pr_S) in order to complete the time cycle.

$[Pa_S \rightarrow Pa_E] \rightarrow [Pa_E \rightarrow Pa_S] \rightarrow Pa_{(ExS)} \rightarrow Pr_R \rightarrow Pa_R$ [R : Radiation]

Next, the latest memory “Me” the memory of Space (Pa_S) in the universal memory series

$0 \rightarrow Pa_E \rightarrow Pa_S$ goes into the memory of Energy (Pa_E) as per His choice in the direction for creating His own Organic model of consciousness i.e. $[Pa_S \rightarrow Pa_E]$ because of

Oneness between them and as a result the energy memory (Pa_E) emerges in the memory of Space (Pa_S), i.e. $[Pa_E \rightarrow Pa_S]$ due to oneness between them and as a result the space memory (Pa_S) gets redesigned $[Pa_{(ExS)}]$ as per the description of Energy-memory emerged in it due to Oneness between them. Redesigned memory of space $[Pa_{(ExS)}]$ appears as a Present i.e. Radiation (Pr_R) as a creation in the description of Energy in Space . Now the Radiation goes Past (Pa_R) and exists in the universal memory series as amemory, the series becomes longer, the universal consciousness and the initial primitive universe becomes more matured. Now the universal memory series appears as

$0 \rightarrow Pa_E \rightarrow Pa_S \rightarrow Pa_R$. The memory (Past) of Radiation(Pa_R) comes as the latest and conscious memory of the series.

$$[Pa_R \rightarrow Pa_E] \rightarrow [Pa_E \rightarrow Pa_R] \rightarrow Pa_{(ExR)} \rightarrow Pr_P \rightarrow Pa_P \quad [P : Plasma]$$

Latest and conscious universal memory “Me” the memory of Radiation (Pa_R) goes into the memory (Past) of Energy (Pa_E) of His choice, i.e. $Pa_R \rightarrow Pa_E$ in the universal

$0 \rightarrow Pa_E \rightarrow Pa_S \rightarrow Pa_R$ and as a result of this, the energy memory (Pa_E) emerges in the memory of Radiation (Pa_R), i.e. $[Pa_E \rightarrow Pa_R]$ and resultantly the radiation memory (Pa_R) gets redesigned $[Pa_{(ExR)}]$ as per the description of energy memory emerged in it and the Radiation appears as very hot Plasma full of Energy. This redesigned memory of Radiation appears as Present in the form of Plasma (Pr_P) as a creation in the description of very high Energy in Radiations. Present, i.e. Plasma becomes Past to complete the time cycle and appears as a plasma memory (Pa_P) in the universal memory series.

Now the universal memory series appears as $0 \rightarrow Pa_E \rightarrow Pa_S \rightarrow Pa_R \rightarrow Pa_P$ and the memory (Past) of Plasma (Pa_P) comes here as the latest and conscious memory the universal “Me” of the series.

$$[Pa_P \rightarrow Pa_S] \rightarrow [Pa_S \rightarrow Pa_P] \rightarrow Pa_{(SxP)} \rightarrow Pr_M \rightarrow Pa_M \quad [M : Matter]$$

Now , the latest and conscious universal memory “Me” the memory of Plasma (Pa_P) goes into the memory (Past) of Space (Pa_S) of His choice, i.e. $Pa_P \rightarrow Pa_S$ in the

universal memory series $0 \rightarrow Pa_E \rightarrow Pa_S \rightarrow Pa_R \rightarrow Pa_P$ and as a result of this, the space memory (Pa_S) emerges in the memory of Plasma (Pa_P), i.e. $[Pa_S \rightarrow Pa_P]$ and resultantly the plasma memory (Pa_P) gets redesigned $[Pa_{(SXP)}]$ as per the description of space memory emerged in it and then the redesigned memory of Plasma appears as a creation of Matter in the description of Space in Plasma . This redesigned memory of Plasma appears as Present i.e. Matter (Pr_M) in the form of dust in the Space. Present i.e. Matter becomes Past to complete the time cycle and appears as a matter memory (Pa_M) in the universal memory series.

Now, the universal memory series appears as $0 \rightarrow Pa_E \rightarrow Pa_S \rightarrow Pa_R \rightarrow Pa_P \rightarrow Pa_M$ and the memory (Past) of Matter (Pa_M) comes here as the latest and conscious memory universal “Me” of the series.

$$[Pa_M \rightarrow Pa_R] \rightarrow [Pa_R \rightarrow Pa_M] \rightarrow Pa_{(RXM)} \rightarrow Pr_G \rightarrow Pa_G [G : Galaxy]$$

Then , latest and conscious universal memory “Me” the memory of Matter (Pa_M) goes into (remembers) the memory (Past) of Radiation (Pa_R) of His choice, i.e. Pa_M

$\rightarrow Pa_R$ in the universal memory series $0 \rightarrow Pa_E \rightarrow Pa_S \rightarrow Pa_R \rightarrow Pa_P \rightarrow Pa_M$ and as a result of this, the radiation memory (Pa_R) comes into (emerges) the memory of Matter (Pa_M), i.e. $[Pa_R \rightarrow Pa_M]$ and resultantly the memory of Matter (Pa_M) gets redesigned $[Pa_{(RXM)}]$ as per the description of radiation memory emerged in it and then the redesigned memory of Matter appears as the formation of Galaxies (Pr_G) in the description (Past-memory) of radiation.

This redesigned memory of Matter appears as Present in the form of Galaxy (Pr_G) and then the Present, i.e. Galaxy becomes Past to complete the time cycle and appears as a memory of Galaxy (Pa_G) in the universal memory series. Now, the universal memory series appears as $0 \rightarrow Pa_E \rightarrow Pa_S \rightarrow Pa_R \rightarrow Pa_P \rightarrow Pa_M \rightarrow Pa_G$ and the memory (Past) of Galaxy (Pa_G) comes here as the latest and conscious memory universal “Me” of the series.

$$[Pa_G \rightarrow Pa_P] \rightarrow [Pa_P \rightarrow Pa_G] \rightarrow Pa_{(PXG)} \rightarrow Pr_{ST} \rightarrow Pa_{ST} [ST : Star]$$

Next latest and conscious universal memory “Me” of Galaxy (Pa_G) goes into (remembers) the memory(Past) of Plasma(Pa_P) by His choice, i.e. $[Pa_G \rightarrow Pa_P]$ in the universal memory

series $0 \rightarrow Pa_E \rightarrow Pa_S \rightarrow Pa_R \rightarrow Pa_P \rightarrow Pa_M \rightarrow Pa_G$ and as a result of this, the

plasma memory (Pa_p) comes into (emerges in) the memory of Galaxy (Pa_G), i.e. $[Pa_p \rightarrow Pa_G]$ and resultantly the memory of Galaxy (Pa_G) gets redesigned $[Pa_{(p \times G)}]$ as per the description of plasma memory emerged in it and it appears as the formation of Stars in the form of Plasma balls in the Galaxy. Here redesigned memory of Galaxy appears as Present in the form of Stars (Pr_{ST}) and the Present, i.e. stars become Past to complete the time cycle and appears as a memory of stars (Pa_{ST}) in the universal memory series.

Now, the universal memory series appears as $0 \rightarrow Pa_E \rightarrow Pa_S \rightarrow Pa_R \rightarrow Pa_p \rightarrow Pa_M \rightarrow Pa_G \rightarrow Pa_{ST}$. The memory (Past) of Stars (Pa_{ST}) comes here as the latest and conscious universal memory “Me” of the series.

$$[Pa_{ST} \rightarrow Pa_S] \rightarrow [Pa_S \rightarrow Pa_{ST}] \rightarrow Pa_{(s \times ST)} \rightarrow Pr_{PL} \rightarrow Pa_{PL} \quad [PL : Planet]$$

Now latest and conscious universal memory “Me” of stars (Pa_{ST}) goes into the memory (Past) of Space (Pa_S) by his choice, i.e. $[Pa_{ST} \rightarrow Pa_S]$ in the universal memory series

$0 \rightarrow Pa_E \rightarrow Pa_S \rightarrow Pa_R \rightarrow Pa_p \rightarrow Pa_M \rightarrow Pa_G \rightarrow Pa_{ST}$ and as a result of this, the space memory (Pa_S) comes into the memory of Stars (Pa_{ST}), i.e. $[Pa_S \rightarrow Pa_{ST}]$ and resultantly the memory of Stars (Pa_{ST}) gets redesigned $[Pa_{(s \times ST)}]$ as per the description of space memory emerged in it and it appears as the formation of Planets around the Stars in the descriptions of Space in the Stars. Here redesigned memory of Stars appears as Present in the form of Planets (Pr_{PL}) and the Planets become Past to complete the time cycle and appears as a memory of Planets (Pa_{PL}) in the universal memory series. Now, the universal memory series appears as $0 \rightarrow Pa_E \rightarrow Pa_S \rightarrow Pa_R \rightarrow Pa_p \rightarrow Pa_M \rightarrow Pa_G \rightarrow Pa_{ST} \rightarrow Pa_{PL}$. The memory (Past) of Planets (Pa_{PL}) comes here as a latest and conscious universal memory “Me” of the series.

$$[Pa_{PL} \rightarrow 0] \rightarrow [0 \rightarrow Pa_{PL}] \rightarrow Pa_{(o \times PL)} \rightarrow Pr_L \rightarrow Pa_L \quad [L : Life]$$

Lives on Planet Earth

Again the latest and conscious universal memory “Me” of Planet(P_{PL}) goes into the initial Past i.e.Nothingness-memory (0) by His choice, i.e. [$Pa_{PL} \rightarrow 0$] in the universal memory series

 $0 \rightarrow Pa_E \rightarrow Pa_S \rightarrow Pa_R \rightarrow Pa_P \rightarrow Pa_M \rightarrow Pa_G \rightarrow Pa_{ST} \rightarrow Pa_{PL}$ and as a result of this, the Nothingness memory(0) comes into the memory of Planet(Pa_{PL}), i.e.

[$0 \rightarrow Pa_{PL}$] and resultantly the memory of Planet (Pa_{PL}) gets redesigned [$Pa_{(0xPL)}$] as per the description of Nothingness memory emerged in it and it appears as a formation of organic consciousness (lives) in the descriptions of Nothingness-memories as the initial consciousness of organisms in the Planet. Here we see that universal consciousness remembers(wills) and the creation comes into being accordingly.

Universal or Supreme consciousness comes into Himself in the form of more developed Universe full of lives (Pr_L) of many different consciousness levels as a Present through various physical and chemical actions and reactions over billions of years down the present \rightarrow past \rightarrow present time cycle. Universal consciousness does as He is, so in every past \rightarrow present \rightarrow past time cycle He goes doing as per Himself and ultimately He reaches to the doing of Himself (consciousness) as the lives of many different developmental consciousness levels in the Universe. Therefore, what consciousness we feel as different living beings within ourselves is outright Supreme Consciousness himself in many different developmental levels of consciousness based on the life concerned Since, “I” as the universal consciousness only go creating and maturing myself as well as the Universe along the timeline, nothing is there to disturb Me and stop me the work, automatically virtues say, - peace, purity, love, joy, bliss, powers and knowledge develop in Me. Since human memory series is a part of universal memory series, latest memory “Me” of human memory series always goes in the directions in order to come in Oneness with universal Me. But if human consciousness goes in a wrong direction away from universal consciousness being driven by His will, vices say- lust, attachment, ego, greed and anger emerge in him for the absence of virtues.

Total Universe of lives automatically becomes transformed into the Past . Living body passes through changes along the past \rightarrow present \rightarrow past time cycle. Living body together with its consciousness goes developing with the passing by time to a certain maturity level. Entire Universe also goes developing with its consciousness down the line of maturity development level simultaneously. As per the law of Universe, Consciousness of living body exists in the Oneness with Supreme Consciousness of entire Universe, therefore no living body can survive unless the consciousness of it exists in the Oneness with

Supreme Consciousness.

Resultantly those Living bodies will automatically pass through the destruction up to the root level down the natural changes in the past → present → past time cycle. Now in question, how can the consciousness of living body, i.e. human being exist together in the oneness with Supreme Consciousness? First of all we need to know the true nature of universal (Supreme) Consciousness. All the memories of Supreme Consciousness exist in the Oneness in zero physical dimension, so there is no opposition and reaction among memories of the universal consciousness, therefore automatically universal Consciousness in the form of universal conscious mind wills down the Past → present → past time cycle to the final maturity of the Universe and universal Consciousness and He faces no set back or hindrances to the fulfillment of His wills. His ways down the past → present → past time cycle to the creation is perfectly smooth and fully free of all sorts of disturbances. No one is there to disturb Him. What He wills soon comes to happen. Everything happens according to His will. Hence He is almighty Consciousness.

So He has no competition with any one, therefore He has got no anger arising from disturbances to the rendition of His works. He has no fear or tension arising from the competition with anyone. Now the total absence of anger and fear in the mind of universal consciousness appears as peace, love, mercy, and affection. So God is loveful and merciful.

Now it is very much clear that, human beings all over the world need to conceive the godly qualities like love, affection and mercy to exist together in the Oneness with universal consciousness, i.e. God for their own survival and development in this world. Otherwise unwise haughty jealous greedy cruel and self-centered mankind will be naturally abolished from this world forever for being in the Oneness with self-ego and not being in the Oneness with God. Their haughtiness, jealousy, greed, anger and cruelty keep them away from being in the Oneness with universal consciousness i.e. God.

As the Past → Present → Past time cycle goes on, the consciousness of human beings and also other intelligent beings living in different planets and places in the universe are getting matured up to the level of universal consciousness along the passing by time. But those intelligent beings of entire universe who are not getting matured towards the Oneness with universal consciousness for their vices get destructed, because they go against the law of creation. The consciousness of living beings come in the Oneness with universal consciousness to many different levels of maturity in some different ways, say, -

(A) by meditation Yoga (B) by final maturity of the creation. Meditation Yoga and final maturity of creations are in the equal level of attainment in the maturity field. Finally matured living beings will survive in the finally matured Universe in future after the massive natural destructions of backward living beings full of vices throughout the Universe.

Once the time will come down the natural time cycle, when no immatured non-intelligent living being will exist or survive in this Universe, they will be totally extinct and only the fully matured living beings will survive in the fully matured Universe. We have come to know that all the changes in space, energy and matter are together aiming the final maturity of the living beings and also the Universe, down the time cycle from the very beginning of the entire Universe. Therefore time cycle past → present → past of changes towards the maturity of the Universe will once stop at Past when the consciousness of intelligent beings will be as matured as the Consciousness of Universe i.e. Supreme Consciousness, the Universe will disappear into the nothingness i.e. Nothingness-memory the beginning of the Universe and will start again from the very beginning .

Nothingness is an extra universal thing which exists but not made up of space, energy, and matter, it is Nothingness-memory or Zero. When the zeros exist together in the Oneness, they form the consciousness i.e. Conscious mind. One zero goes into another zero for their Oneness and finally the Consciousness formed comes into living body through the very long chronological maturity stages of the Universe. Death is the last past phase of living body. After death if the consciousness of living body does not have a least of godly qualities like peace and love, the consciousness exists in the Oneness with self-ego as ghost separately for a certain period of time and the ghost becomes feeble for its automatic changes towards godly qualities for it has no physical body and finally disappears into rebirth. Rebirths happen when universal Me remembers organic Me that already exists in His memory series as a part of it.

Ghost is a consciousness, so it exists in zero physical dimension therefore, conscious mind of ghost enters into its nearest subconscious mind in the memory series and as a result nearest subconscious mind emerges in the conscious mind of it and this Doing appears as electromagnetic energy (so called) in the form of paranormal activities as a Present.

Apart from this about eight hundred crores of minds in the world population become eight hundred crores of various sub conscious minds of every single person in the world, because they all exist in Oneness altogether for no physical existence of their minds. Therefore eight hundred crores of minds in the world population are the sub conscious minds of every single person but the conscious

mind is his own. So there is a single person made of eight hundred crores of sub-conscious minds in the world who remains in search of a better idea with a better mind. So automatically rest minds get expunged in due course of time with the development of universe. So when a man pursues and realizes God is called godly realization or apperception and when a man pursues and realizes the ghost is called ghostly realization which is an occult knowledge.

Undoubtedly and definitely we need to pursue and realize God for peace, prosperity and happiness pursuant to the past → present → past time cycle of Universe. Universal conscious Me and the conscious Me of living beings cannot exist without doing a thing because they exist in the Oneness with previous memory (sub-conscious mind). Suppose, "I" the latest memory universal Me do, therefore I am a Doing, Doing becomes a Being, therefore I become a being, i.e. Present or the Universe. It again proves that universal Consciousness becomes Universe.

When a person's consciousness exists together in the Oneness with universal Consciousness by his godly qualities, The Will of supreme Consciousness becomes the Will of that person because of Oneness between. The frequency between Past and Present i.e., consciousness of body and the body itself appear as lust which causes to happen two opposite sexes in higher living organisms as male and female. All of our efforts should be concentrated to the Supreme Consciousness to make Oneness with him and to use his will as our will.
