## **Our Products**

Zippers & Sliders/Pullers

Various varieties in zippers & sliders/pullers

## **OBJECTIVES**

It includes continuous improvement in product quality and customer satisfaction. We strive to stay ahead of industry trends and constantly innovate our products to meet the evolving needs of our customers. Additionally, we aim to expand our market presence globally and forge strong partnerships with distributors and retailers worldwide. Furthermore, we are committed to providing exceptional customer service and building long-lasting relationships with our clients. By offering personalized solutions and addressing their specific needs, we aim to exceed their expectations and ensure their satisfaction. Our ultimate goal is to become a leading player in the industry, recognized for our unmatched quality, innovation, and customer-centric approach. By consistently delivering exceptional products and services, we are confident in our ability to achieve these objectives and solidify our position as a leader in the zipper manufacturing industry. We believe that our success lies in building strong and long-lasting relationships with our clients. We strive to understand their unique requirements and provide them with

tailor-made solutions that not only meet but exceed their expectations. With a customer-centric approach at the core of our business, we are committed to continuously improving and innovating our products and services to ensure maximum satisfaction for our clients.

## **SCOPE & LIMITATIONS**

The scope of Sky Zippers includes providing high-quality zip line equipment and services to adventure parks and outdoor recreational facilities. Our expertise lies in designing, manufacturing, and installing safe and thrilling zip line experiences for our clients. However, it's important to note that our services are limited to the installation and maintenance of zip lines, and we do not offer any other adventure or recreational activities. Additionally, we ensure that all our equipment meets industry safety standards and undergoes regular inspections to guarantee the utmost safety for our clients. Furthermore, our team of experienced professionals is available to provide training and support to park staff in operating and maintaining the zip line equipment. Additionally, while we strive to ensure the safety of our equipment and installations, it is essential for our clients to adhere to all safety guidelines and instructions provided by our staff. This includes wearing appropriate safety gear, following weight and height restrictions, and listening to any safety briefings before participating in any activities. By working together, we can create a safe and enjoyable experience for everyone involved.

## **NEED OF THE STUDY**

### **THIS STUDY AIMS AT THE FOLLOWING:**

1. To determine, identify, essence of quality control in the reader.
2. To find out the importance of quality control.
3. To find out the problems facing quality control their cause and possible solutions.
4. To identify the different techniques of quality control.
5. To determine the application and problems

The study of Sky Zippers, a zipper trading company, is important to understand their products, market trends, and customer preferences. This analysis helps identify opportunities for growth and improvement in their business operations. Additionally, studying Sky Zippers can provide insights into the competitive landscape and help develop strategies to stay ahead in the industry.

## **SIGNIFICANCE**

This study is significant because it will or reveals the problems of quality control and how to solve or manage the problems.

### **THE BENEFICIARIES OF THE STUDY INCLUDE:**

1. Students of marketing, production management, management and other related fields of study
2. Practicing managers at all levels of management especially quality control managers.
3. Owners of business (manufacturing) firms.

## **RESEARCH QUESTIONS**

To accomplish the purpose of this study, the willowing research questions will be examined.

1. What are the key factors influencing the quality and efficiency of Sky Zippers' manufacturing processes?
2. What are the key factors that influence the success of Sky Zippers' manufacturing operations?
3. What steps has Sky Zippers taken to ensure continuous improvement in their manufacturing processes and how have these initiatives impacted their overall efficiency and quality?"

## LITERATURE REVIEW

A literature review on the marketing analysis of the company provides a comprehensive understanding of the various strategies and techniques used by the company to analyse its market. It explores the different marketing analysis tools and methodologies employed, such as SWOT analysis, PESTEL analysis, and Porter's Five Forces framework. Additionally, the literature review examines the effectiveness of these strategies in helping the company identify market trends, evaluate competitors, and make informed decisions regarding product development and positioning. It also analyses how the company's marketing analysis has evolved over time and identifies any gaps or areas for improvement in its current approach. Additionally, it examines how these analyses are used to identify market trends, consumer behaviour patterns, competitive advantages, and potential opportunities for growth and expansion. The literature review also highlights the importance of continuous monitoring and evaluation of marketing strategies to ensure their effectiveness and adaptability in a dynamic market environment. It emphasises the need for companies to stay updated with emerging technologies and changing customer preferences to maintain a competitive edge. Furthermore, the review explores the role of market research in gathering valuable insights and data that inform decision-making processes, enabling companies to make informed choices about product development, pricing strategies, and target market selection.

A literature review on the marketing analysis of Sky Zippers can provide students with a deeper understanding of the company's promotional strategies, target market segmentation, and competitive positioning. This analysis can help students identify the key factors that have contributed to Sky Zippers' success in the market and evaluate the effectiveness of their marketing efforts. Furthermore, it can also enable students to propose innovative marketing approaches or identify areas where the company can further enhance its marketing strategies to maintain a competitive edge in the industry.

## SOURCE OF DATA COLLECTION

The project is a systematic presentation consisting of the enunciated problem, formulated Hypothesis, collected facts of data, analysed facts and proposed conclusions in form of Recommendations. The data has been collected from both the sources primary and secondary sources.

### Primary Data:

Primary data was collected through survey method by distributing questionnaires to employees. The questionnaires were carefully designed by taking into account the parameters of my study.

**Secondary Data:** Data was collected from web sites, going through the records of the organisation, etc. It is the data which has been collected by individual or someone else for the purpose of other than those

of our particular research study. Or in other words we can say that secondary data is the data used previously for the analysis and the results are undertaken for the next process.

## TECHNIQUE ANALYSIS

The analysis of the data is done as per the survey finding. The data is represented graphically in percentage. The percentage of the people opinion were analysed and expressed in the form of charts. The data collected from both the sources is analysed and interpreted in the systematic manner with the help of statistical tool like percentages.

## PROPOSED STRUCTURE

A research design is the arrangement of the condition for collection and analysis of data in a manner that aims to combine relevance to the research purpose with economy in procedure. A research design is the specification of methods and procedure for acquiring the information needed to structure or to solve problems. It is the overall operation pattern or framework of the project that stipulates what information is to be collected from which

## BIBLIOGRAPHY

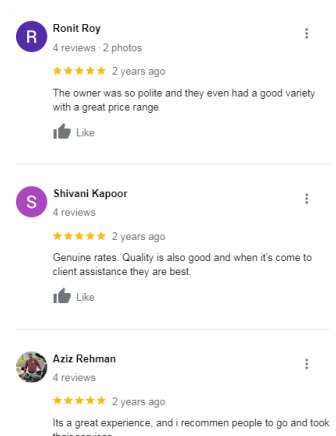

Data collected during the period of internship from the following departments of the company:-

- Marketing team
- Sales departments
- Employee referrals
- Backend team
- Resources
- Contract to higher staff, direct hire staff and strategic staffing
- Other related departments

Some data collected from Wikipedia and other related websites.
