

An Analysis of Impact of Social-Discrimination on People Having Hiv/Aids

Ankit Bharti

Student, Galgotias University

Abstract

The truth always at last have a goal to achieve. this paper is focus on the recognition of the people who are not much discussed and feels a different era of discrimination and health deteriorating conditions. The focus of this paper, to study the sociological imbalance and , authoritative guidance which is not in the practical form, is guided in the study. Remarking how these persons are getting affected and have to go to a not possible winning situation is the major topic of discussion. the analysation of this situation through a legal approach and calculating the risk in the broad daylight phenomena and to answer the significance of why these types of studies are needed to be study through a lens of proper awakening. this research is based on majorly doctrinal research method. The scope of the research is on the platform of health laws and fundamental principles which are involved to live a happy going life, in the patterns of history , then to present era, to the future dimensions will be talked in this research. Every person going through the pain and suffering and then getting a specified level of different discrimination is needed to be studied in this paper. The level of objective choices available and are customised by other people is the outcomes of this paper. the study of this paper will be giving the desired solutions and asking challenges to be negotiated and to calculate the greater harms if any , that can be resolved through the study.by balancing the relation between this type of framings will be the desiring approach. How It Feels-

A person knowing that he is infected, with this type of virus, which now governs his life, and now living with a different type of social dilemma and to be motivational in this type of scenario, knowing that in that next moment again can get demotivated, is the phenomena.

Unless and until someone goes through this, can not give the definition in human consciousness, everyone can judge but can not dignify or glorify the perspective from the inner sense that how it feels , in this type of phenomena. people can say much about this, but no one can understand totally what they are facing and what is needed always at the time of crises. seeing yourself day by day, that you are in a different phase of untruthful justification is the core impact of this analysis.

Better to understand than to avoid is always a desired approach.

Everyone see this as an undepressed suicide but this is a repeated motivation task.

That's the way to grow and go in the society, this is the regaining of consciousness to show to others that we are also feeling that you are going through what, and needs a helping hand. someone diagnosed with

this , than if he is a pessimist person, he dies the very day of finding this, and an optimist borns a new life the very day. As soon people understand the need, is soon for forming faith.

A situation is needed to be understood from a common observed approach.

A person doesn't having HIV, get infected due to getting transfer from an infected person by any method of transmission. Now what. there is in stricter sense what is available to that person's suffering. Upcoming tragedy of death, upcoming scenarios of death, unfaithful learning of circumstances, versatile needs, lack of passion, common cause for depression, inhuman characters of shamefulness, deep down suffering of channelised hardships, unattained psychological channels of stress, behaviour of untruthful nature ,rigorous pain describe in communication and what is not else .the person become slave of the reaction of his mind, and only a few have the ability to be come out from the situation.

There are laws like HIV act¹ , there is implementation and there are scenarios of social discrimination and the cause is un justified dilemma of gaining unconsciousness. Let looks deeper to the hard truth and that is , the unverified view towards a disturbed person. A person will have to be a subject of unknown factors that makes him a suitable person of unworthy justification. laws are implemented in a way that guides that there is a sense of compassion towards the wrong happening. All things are mentioned for the welfare of the victimised persons but the causable thing is that they are not in practical sense fully adjust, the no contact situation, and that's also through the well established principles about the resourcefulness of an esteemed requisite .the laws, acts determine the total objectivity in the way of helpful ness of a developed phenomena that, this person is facing the problem, so he should be tolerated to be in common true friendship of the faith.

Many times the disturbed community have been tried by persons to be respected, but sooner or later the respects fades. this is a channelization of thought processes. And the behavioural significance of the adjusted study. Many focuses on the liberty, many focuses on the unjustified arena of discrimination. we living in the society are not able to take initiative for the desired cause, the persons are vulnerable to not be able to understand the path , to the solace is justified.

Everything in this frame lack practicality, they are in the phases of defined written textured documents but fails to apply the basic principle which lacks inconvenience. the person are been diminished in the system of convenience in any field , they are not regulated with the alignment of stricter sense of disciplined faith and helping guideness, towards a deeper extent of faithfulness. meaning in this sense that the practical approach for them lacks , they are controlled by the unnatural understanding towards the dreamy world. with the optimum focus towards a defined goal, they are tried in a confiscated manner and are recognised to possible justification.

Why there is a need felt to discuss this.

There is a need, very crucial one. that is to show a behavioural pattern of helping hands, to get known about the fact that how HIV transmit, it is not like shaking hand will cause you a HIV with the infected person. There is a need to sanitise the people about total understanding towards these unchanneled scope of understanding. this people have to come forward, for the welfare of the innocent, someone will be a torch bearer. There are institutes, but the major thing is non implementation of sanitising the generation of specified field to be judged by the belonging and the choice available.

Why people knowing the fact that they are aware to the transmission, that how it transmit , but the thing is how they knowing the transmitting significance , than as a precaution measure to avoid them said by

¹ [HIV/AIDS Act 2017 | National AIDS Control Organization | MoHFW | Gol \(naco.gov.in\)](#) (LAST MODIFIED ON 29/12/2023)

major persons. they may be right if they say it is open in air significance but if it is through the channelised blood in a human , how easily can be that transmit.

How it is going-it is going with the welfare of the needy one, but the respect to the aspect that they are facing discriminated is followed. some people not even want to meet them, that's why they function their body accordingly. The level of hatred to a group is not justified at any cost and the welfare for them is partially adjusted. wherever there is a difference created to discriminate a person due to a certain reasoning of unjustified reason, there is a death in the society. People focus on the need of their houses, and then later to the other social factors. this is from the government side is implemented ,in a very crucial nature but the practical approach is hard to justify.

Social Discrimination Framing

What it is?

The discriminative era ,and that also having article 15 in the constitution of India², than also, a discriminative scenario that has been consciously judged in a very insignificant way of ruthless behaviour towards the other humans, shows the discriminative perspective, of how the humans and how the society is binded with failure of justice to themselves and to the humans .the society crucially determines the right , but the thing is it does not justify the wellbeing of truthfulness inside ones thinking approach to significantly find the tolerance towards the chain of circumstances. when things does not go with the flow towards a particular community, they termed it as a bad significant channel to the harmony of that level , but why the significant judgement is crucial in determining the faith of a deep rooted terminology.every body deserves to be feel respected and to be touched by the humanity. the role of any nation has develop the channel to resources and than to the principles later to the physical sense. But the true channelised behaviour is understand by the nature of how to behave with any defined person. people lack compassion, people lack justification, and also people tolerate the goal to be a rude behavioural pattern of dignified justification towards the aids infected patient.

So the cause is justified. But how people deal with this phenomena.

A person having this disease, has been seen as an unnecessary element towards any social community , who have lack of knowledge. this describes the pattern of the society, how it necessitates things. There is also a saying that , what is essential, is easily absorbed.so it is also absorbed but because of the reason that it is negatively criticised ,in a major fashion.

There are always views in different pattern and there are views in different phases, dimensions, culture, belief, nature, in the scope of justification, terminology and enhancement of progress of a society. This is the way that , justified how to be essentially craft the belief system about a objectionable term.

Than in the significance of this resource is how people are tolerating this. there is always a need to go through the concept with a wider note that if a person is having HIV or aids , people starting moving from the said side, in the flow that is a conceptualised phenomenon of social induced discrimination.

Every discrimination can be a long-term chain of unacceptance in the society ,and this types create fear, this may be because of lack of knowledge on the side of the framing of the justification of a cultured phenomenon. the rights of a humans are justified and termed in the sense of what is essential and what is crucial in the channelization of the terms specified. this is the welfare scheme of any research term that

²[Article 15: Prohibition of discrimination on grounds of religion, race, caste, sex or place of birth - Constitution of India](#)
(Last modified on 29/12/2023)

how it is justified and, in the flow, how this is taken as a welfare part and the cultural way of significance appearance of a system of beliefs.

So this is the monitoring strategy of any philosophical sense also. but the thing is because of lack of knowledge and vibrant fear, the discipline that is involved, is harsh for the failure of justice towards a community in the society. This is cursing to the welfare of a community. and this is accustomed with the defined scheme of the society.

So the thing is what things lack?

In a society , the passion towards a belief that these people who are suffering should be avoided creates a sense of disturbance in the mind of people and because of this type of scenarios the human in which the disease arrives, start calculating his days, because this makes a person as imbalance and uncultured in the society, he fears living with a disease as a curse. people can try behaving normal to the situation, can bring so much situation to narrow down but this happens as a chain of event than ,it is essential to note down how this goes with the flow and cause disturbance. In the art framing scenario this is significant to justified why the belief system is neutralise and how this asymptomatic judgement can be crushed.

The majority of the established society have shown the scope of fear and outcomes of that fear which have crushed ,how much level of social happiness of people and of the community at large. this is not a reason to distinguish but not a symptom to be astonished .this is true in the very significance and this is happening and will happen, who knows till which date, the frequency have been in so much delinquency.

The roar of the society signifies in the manner of pampering culture and religion, but who knows the utmost religion is to serve the needy.at last everyone wants their pocket to be full and healthy, no one wants to think how the one who suffers feels .how the nights of winter shrinks the poor needy ones. this is the surface of the generations need and the outcomes of the generations fame. The belief system of the society is diverted towards this type of philosophy. the outcomes of a role to be in conduct is same as that of role model of conduct.

The dignified image of a balanced formula, is that of a justified beginning. and a significance of the just and unjust. the true structure lies in this system of outcomes and resonates the procedure of renaissance needed. the faith is the just of the blessed terms and the signified need to think about these victims. they did not needed to be punished by the society as they are already in harsh situation.

Other significance is why people fear?

Any thing that is in the force is because of certain reasoning maintained by the developed society, the same is here recognized.to be in the balance, people already have clarified their objectives that why they are in the situation of fear, why there is an arrangement of circumstances, all is in the material world governed by certain principles of fear. People have customized themselves with the fear to be cautious and to be subjective to the situation.

This is the needed way to understand that , why people feel this fear, because seeing the fact as overlooking the situation, that certain human has an HIV or aids , people start calculating their unsurprise death, which is not needed. this is the game of failure and fear.

Because of this type of fear stimulated in the mind people never get an imaginative truth about the destiny, keep relying on the fact that they are more substantive , will amount to unsuccessful outcomes.

People fear because they have maintained a philosophy to avoid fear, they avoid people linking to this, or seeing those people fear come forwards. this is the reality of todays framework and this will remains till what time, is not a scholarly principle.

Framing For Controlling This

Practical Approach

In every type of phase of time, many generations have built the philosophy to fight the rarest of rare diseases. This is a scientific analysis of the youth structure of the generosity.

Many have come and many have gone but the welfare of a community have been defined by the type of result a community have served. This is the majoritocal way of the results to be dignified in the manner of calculating the practical approach. the just and unjust manners are always discussed and are always termed in stricter sense to what a goal is to be glorified but the significance of a person dream is in the sense of what is great and what can be truly accomplish in the lifetime of a person.

The significant beauty of a phase that have gone through the concept of right and wrong is truly established by the nature of history that has been followed. Judging other aspect that if someone truly wants to develop the phrase or structure in the society , he has to break the patterns and have to come forward. Now coming on to a situation, where the demand is to cultivate the need of establishing the joint for the gaps between infected and uninfected person. this is the impact of truly welfare scheme, there have to be the significance that people have to think openly, the needs of the infected members of the society if we make them caution in nature and protective in nature, we all already get in the frame of protectiveness. This is the philosophy of the man from the visualizations and concepts of truth and welfare. This is the arena of truth and this is the welfare of subjective welfare.

Helping Hand

Whenever people started thinking of helping the person of grief with a helping hand ,they have succeed in a moderate pattern. this looks easy but it is the hardest choice available, many things can be spoken ,but accordingly to the society it comes into force. whatever can be said but the true factor of the framing of giving a helping hand will be the sanitisation of the mind of the people and through courage and respect to those who once help will build the impact of this type of scenarios. the true level of hardship that has to be recognize is by the judging portion of what is true, and what is in fire proven. nothing will be more subjective than the objectivity of the failure of this type of rules. the help lies in the mind just physically the thoughts are made in action. to be human, have to be like humans, other wise there is a difference, there will be a difference, and the future will be also in a difference in the level of the compassion.

Basics of the humans that disease is in force determines and signifies that how the people give impact to the generations to come and to the generations to come forward now.

Many times failures comes with eye opening framing but many times the recognition is through the arrangement of signified philosophy. if someone is dying and people are happy to see it, assuming let he dies otherwise there are instance to get yourself infected than what will be the signified truth.

If we live in the society with destructive scopes than it is correct to notified the structure but the true generations is the welfare of the people lies.

Conclusiveness

Let there be an image that they helps HIV patients but if the precaution is done than why cant be a life with them is also not possible. if people want they can do. it lies in the consciousness.

When the structure is to be justified, the true image of the living philosophy is to be first justified . people have to come forward, ,they have to understand how it feels, than assuming that thing without going through it, by just assuming ,laws can be implemented . but because of lack of practicality, the people classify the discrimination with these people in this frame, and these people undergoes this type of

philosophy. why the need felt here, it is because, we all have to come forward at the time where the species is unjustified. this is not going with a greater pace that's why the need felt to write this, but the true significance that it is justified only clarifies the bitter truth, and because of this philosophy there is lack of truth to be diminished. social discrimination will not go until people start forcing themselves to built themselves to understand the pain of the people who are having HIV , it is needed in true sense to classify the need to instruct the welfare of a deemed state . because of fear if people did not come forward , they will not understand the pain and never understand the mankind fate related to pain .we all are in a arena of pain, with a justified classification of fame, and justified image of regaining consciousness . we are humans that classifies us to be a better world creator, if we can not handle situation than who will handle this type of situation . not to be a failure is the goal of this study and finding peace.
