

Explanation of Numerical Change (In Energy Etc) by New Algebra

Souravlal Singha

Abstract: Numerical Change In Energy Will Be Explained Through New Algebra.

Introduction:

we will try to give a new explanation of numerical change in energy etc.

Main body: Suppose static energy of body a is 90 calories. Now

We are taking two digits 0 and 1.

Here only 0 is true. And 1 is false.

Now suppose we want to make the energy 100 calories. $100=1(1=false)$

$100=1*0=0$ etc.

$100=1-1=0$

$100=1=0$

In this way we can achieve lesser false also.

Suppose we want 78 calories

$78=1$

$78=1*0=0$

Or, $78=0$. here 0 is true. 1 is false.

$78=1-1=0$

$78=1=0$

Conclusion:

In this way we can change energy by taking 0 as true and 1 as false. Or We can make numerical change in this way.
