Explanation of Numerical Change (In Energy Etc) by New Binary(0,-1) Algebra

Souravlal Singha

Student, Ipgme&r

Abstract:

numerical change in energy will be explained through new algebra.

Introduction:

we will try to give a new explanation of numerical change in energy etc.

Main body:

Suppose static energy of body a is 90 calories. Now

We are taking 2 numbers – 1 and 0

Here-1is false and 0 is true

Now suppose we want to make the energy 100 calories. 100=-1(-1=false)

100=-1*0=0

100=-1-(-1)=0

In this way we can achieve lesser false also.

Suppose we want 78 calories

78=-1

78=-1*0=0

Or,78=-1-(-1)=0

Conclusion:

In this way we can change energy by taking-1 and 0(-1=false 0=true). Or We can make numerical change by this binary number system also.
